

My Dream Garden

By: Eleanor Kuniyoshi

If I had a dream garden it would have garden fairies, flowers, trees, a water fountain, and magic grass. The fairies would live in the trees that grow sparkly fruit. There would be shiny, flat, and gray stones to walk on. The water fountain would have water that can heal people. The garden fairies would water the plants and help them grow.

The magic grass would be good for making tea, soup, and candy. It's also good for cooking. The magic flowers are very pretty. Different flowers do different things. Roses can heal cuts, a lily would cure a sore throat, and sunflowers are a good to eat. Other flowers can do other things.

I would make people feel welcome. It would be quiet so people can read or take a nap. Kids can play in a sand box. The garden would be a safe place. People can also talk to the garden fairies about their lives. It would be a fun and happy place. I would read a book and see how the plants are doing. I hope people would enjoy my dream garden. My dream garden would be a magical place.

The End
